

DO'S & DON'TS FOR CAST STONE

Make sure storage area is flat, even and dry

Don't store on sloping or uneven ground

Protect window cills from damage during building

Don't stack pallets or large units on top of each other

Use a knife to slit open packaging

Don't use hand or site tools to open packaging

Keep products in packaging until use

Don't slide units across one another

Re-use interior packaging when moving units on site

Don't leave units unprotected on site

Use lifting eyes or sockets where fitted

Don't store pallets on roadways or in access/exit areas

Only bed under stooped ends of cills and thresholds

Don't bed the full length of cills and threshold when installing

Always use a mortar to the design strength mix
